Santa Ana College
Distance Education: Participation, Demographics and Course Success

Compiled by the RSCCD Research Department, March 2013

Santa Ana College offers a wide range of distance education sections each semester, predominately via online delivery. As this type of learning gains in popularity, it is important to continually assess enrollments and outcomes so that we may remain current with the course variety and content needs of our community and the students we serve. This publication offers five semesters (Fall 2010 to Fall 2012) of online course offerings at SAC as compared to the traditional classroom delivery, including number of sections offered, student demographics, course success and retention.

<u>**Summary of Findings**</u>

Distance Education Offerings
Overall, the number of sections offered in distance education has increased 32% since Fall 2010 (113 to 149). Web section offerings are up 67% from Fall 2010. Both web headcount and enrollment are up 41% and 44%, respectively from Fall 2010. Distance education classes are defined by delivery type (web based, hybrid or television); therefore, data is broken down even further to assist program staff in defining specific strategies for specific teaching delivery.

Santa Ana College
Distance Education Sections Offered, Headcount, and Enrollments

Semester	# Sections Offered				Headcount (unduplicated)			Enrollments in classes			
	WEB	HYBRID	TV	TOTAL	WEB	HYBRID	TV	WEB	HYBRID	TV	TOTAL

Demographics
- ➢ The largest group of students who enroll in television and web-based classes are young; more than half of all distance education students at SAC are 25 years of age or younger.
- ➢ More than half (56% to 59%) of the students who enroll in distance education classes are female.
- ➢ Distance education students at SAC are ethnically representative of the student body at large.

Enrollments, Course Success, Retention

Distance Education "program," at best, is an offering of a variety of sections in a variety of subject areas. Therefore, it is challenging to compare one mode of teaching to another based on the grades given by one teacher, one section. Percent distributions are significantly influenced by small sample sizes and caution should be used when comparisons are made.

➢ Across all semesters of study (Fall 2012, Spring 2012, Fall 2011, Spring 2011 and Fall 2010), success rates in distance education classes are lower than those in traditional classrooms (34% to 58% vs. 60% to 63%).
➢ Television classes have very low success rates (34% to 39%) and retention rates (59% to 70%) compared to traditional delivery type (60% to 63%, success rates and 79% to 82%, retention rates).
➢ Detailed success and retention rates (by subject/course/ticket by semester) are included below.
