

Assessment of Distance Education Program SLOs Fall 2013

Santa Ana College has student learning objectives (SLOs) for every course/program. These SLOs are skills that students should acquire as a result of enrolling in that specific course/program. Faculty teaching in the distance education program have developed SLOs in which students enrolled in the program should be able to achieve when they complete courses via distance education. One method to assess our effectiveness is by conducting a short survey to all distance education students. Your feedback is very important and will be strictly anonymous. Results will be compiled and shared with faculty so that they can strategize on ways to improve the distance education courses/program. Thank you for your feedback!

Please respond to following statements:

1. I am able to upload a file to submit an assignment online.*
 - Strongly Agree
 - Agree
 - Disagree
 - Strongly Disagree
 - I have not been asked to submit an assignment by my instructor

2. I am able to submit a test/quiz online.*
