1. I am able to upload a file to submit an assignment online.

2. I am able to submit a test/quiz online.

3. I am confident with my ability to communicate with my instructor online.

Total Respondents 655

4. I communicated with my instructor using:

		Response Total	Response Percent
email		590	90%
discussion board		383	58%
blogs		40	6%
messages		97	15%
Other, please specify tools used view		35	5%
Total Respondents		655	

5. I am confident with my ability to communicate with my classmates online.

		Response Total	Response Percent
Strongly Agree		326	50%
Agree		245	37%
Disagree		35	5%
Strongly Disagree		7	1%
I have not communicated with my classmates online		42	6%
Total Respondents		655	

6. I communicated with my classmates using:

		Response Total	Response Percent
email		261	40%
discussion board		509	78%
blogs		49	7%
messages (within Blackboard)		102	16%
Other, please specify tools used view		61	9%
Total Respondents		655	

7. Additional thoughts regarding our Distance Education program that you would like to share:

insideSAC.net

- Since it is my first time taking online classes it not much that I can compare with, although I have had to adjust myself to it, such as how to read and keep track of the notes and suggestions from the instructor, also trying to meet the dates of submissions and taking the quizzes, it has been a new experience for me. [view](#)
12. I took two online classes this semester and realize that some instructors are more responsive than others. For this reason students should also realize that asking questions and/or requesting more information, about assignments, on the due date does not give the instructor adequate time to respond. [view](#)
13. It is great and very flexible especially because I work full time [view](#)
14. I had a positive experience with The Distance Education program and happy it was available to me. [view](#)
15. Any online classes are going to be difficult at first to understand how to use blackboard n submitting anything, I believe teachers need to understand that not all students will get this and to be more understanding. Also there's always a reason behind why a student is taking online courses and it's usually because their in a difficult situation. Teachers should never overwhelm themselves if they can't understand or respond back ASAP. [view](#)
16. Makes life easy when you can work the class around your schedule [view](#)
17. I am very confident in my ability to operate with online classes. [view](#)
18. Online classes are very helpful for those of us who have a hard time sitting in class or cannot, due to scheduling conflicts. I am very grateful for them. [view](#)
19. I have taken many online courses at different institutions, and I consider this one (ACCT 101) to be one of the best. I love the interface of Blackboard and the tools through McGraw Hill Connect. The threaded discussion boards and the ability to keep track of my grades are excellent. Professor Shain is an excellent instructor. She is knowledgeable, very helpful, patient, kind, and clear. She understands how to teach a course online, and I really appreciate her effort. Her instruction style and the way the course is organized and the online environment have allow me to excel in the course and really enjoy it. [view](#)
20. It is improving nicely. I hope it continues to improve. [view](#)
21. Blackboard is a great resource. Very simple and effective learning style. [view](#)
22. NONE [view](#)
23. Since I am a full-time mom, It is very convenient for me to take online classes. It has more work to do but I really enjoy it. The Black Board is great. There is no technology issues during the semester. [view](#)
24. Really great programs so far! [view](#)
25. I consider the online experience could be enhanced with the use of videos, links, lectures. I consider the whole capacity of blackboard is experienced on this class. [view](#)
26. The Instructors need to be more available. I've had certain Instructors who literally go months between messages to the class, updates, etc....They don't respond to emails, message board posts, or questions. It seems like there is zero accountability for their performance, and that is extremely frustrating. [view](#)
27. It appeared to be an instructor preference to MAIL in assignments. This seemed cumbersome, but I assumed it was part of the lesson plan to demonstrate an ability to follow instructions and assignments. The class content itself was excellent. Tests intricate, but fair. Class notes hugely helpful. Assignments apporropriate. I leared a lot and have a very positve experience. Given my involvment as a non-trational, continuing student, I consider the whole online deliery to be excellent and encourage its expansion. Well done! [view](#)
28. Love the online classes!!! I would do a fully online degree if it was available. [view](#)
29. I thought this class was fun and interesting, when it came to projects and topics discussed in the student blogs. And through the use of internet, the professor was able to inform us on real life situations regarding the advancement of technology and the impact it has made towards our education. [view](#)
30. I've only taken two online classes and I was hesitant since the first time I felt like I didn't learn much, but I was surprised on how well this online Spanish class was put together. I've enjoyed it and learned a lot. [view](#)
31. Distance Education programs can vary with the rate of withdrawing students, however with this in mind, distance education instructors should be prepared with plan B's when projects are difficult to accomplish after groups are scattered when the withdrawing students or dropping students are gone but group members workload doubles (same grade points) and other groups flourish with equal work load (same grade points). [view](#)
32. From my experience with it, it runs really well. [view](#)

33. A few times the system has been down, and I was not able to meet deadlines. Overall, I am able to perform the required tasks and contact individuals as needed. [view](#)
34. Would like for the instructor to respond to my emails in a timely manner. I understand we all have hectic work/ family schedules. Thanks. [view](#)
35. Not all instructors are as accessible as others, but if they are, I have always been able to do so and have appreciated their accessibility. [view](#)
36. I truly appreciate the convenience of Distance Education offered at Santa Ana College. It sharpens my time management skills and provides me the flexibility that I need when working a fulltime job. [view](#)
37. Well, I would like to say that XXXXXXXX is very knowledgeable and his videos that he makes for distance learning are very very good. That being said generally speaking I have found most professors to be very similar to doctors whether they are distance teaching or local. They seem for the most part bothered when asked questions or take a very long time to respond or simply ignore you. XXXXXXXX is pretty good about getting back to you but sometimes I feel disconnected I guess with all of my teachers. Not sure if that makes sense. [view](#)
38. na [view](#)
39. N/A [view](#)
40. It is a great tool to use when your schedule does not permit regular school times. [view](#)
41. I think the procees must be flexible...like when i submitted a wrong assignment, so I can not submit the second time. Thus, i had to send email from the lecturer, it's not convenient. [view](#)
42. It is an excellent program! The time and effort I put in to the SLO program has helped me learn spanish quickly. [view](#)
43. No [view](#)
44. My instructor posts lectures/ power points online but I am not certain he knows how to post quizzes or ask for assignments to be submitted. The hybrid parts of class are very informative and I do appreciate his PowerPoint lectures. However, I feel this class needs some supplementals. Extra videos, websites to view.. Added quizzes online to take to keep the information about the class in use and flowing more. This is the least interactive online class I have taken this far and therefore is the most challenging. It's too independent study styled. Instructor needs to take a class on how to use blackboard. [view](#)
45. I love online classes! I am able to learn at my own pace and study any time of day!! [view](#)
46. Instructor gave weekly email updates on assignments / quiz / exam due for following weeks. The powerpoint slides gave valuable input for coursework. [view](#)
47. Add more online classes [view](#)
48. The HUD class I took this semester was really informative the tools I needed to understand the material were all provided and where easy to find. [view](#)
49. Teacher claims that I did not submit a major essay on blackboard when I indeed DID for XXXXX online course. Teacher is terrible in many ways [view](#)
50. I don't like the fact that the instructor doesn't like direct email. I had to email his thru blackboard, and them post a message in the discussion board to let him know that I send an email thru blackboard. Some issues are private and the students don't want to post the details online. [view](#)
51. Would one unit online not equal one in a brick and mortar class? Is it likely that a certificate program will continue to be about 30 - 35 units and an Associates approx. 60? [view](#)
52. I am fortunate to have been able to take a course that otherwise would have been full capacity at the campus! [view](#)
53. The System Is WEll Put Together And Used. [view](#)
54. I like it [view](#)
55. Class meet up once in a while would be very helpful. Meeting the instructor in person would also be helpful. [view](#)
56. the program needs to get a better understanding that we need to know what we get wrong on our quizzes so we can improve on testing. XXXXXXXX course [view](#)
57. The professor should put deadlines for every assignment that is due, which also includes the discussion boards. Grades should be updated as soon as you complete an assignment or a quiz. The professor should give more than 2 days for people to take the quiz, as sometimes the dates are random and people could miss it unintentionally. [view](#)

58. It's been made to access very easily and is very convenient for those of us who need to take online courses [view](#)
59. NONE [view](#)
60. XXXXX has a RIDICULOUS workload. Sometimes hundreds of pages of reading are assigned for a single week. I challenge anyone to personally do 100% of the reading assigned because I think it is impossible(the online tomes the teacher links to are much arduous than reading from the text-which we also do). Other times I have to arrange driving all over the county to take pictures of different types of "occupancies" personally (such as driving to hazardous waste facilities, sports arenas, factories- there were 25 total) because if I simply find the picture (like online), I will only get half credit. Other times I have a week to arrange with a business a fire inspection where I need permission to take pictures. Not all assignments are due within 1 week, but a new huge assignment is due every week so postponing 1 assignment means now you have double the impossible workload. The teacher is nice, kind, and easy to contact, but XXXX seems completely detached and ignorant of the amount of work she assigns. Someone really should audit this class and figure out how much time it would take to actually do 100% of the reading and every assignment. I probably would have dropped and waited for another person to teach the class if I knew the workload would be this ridiculously high. Don't believe me, seriously check out what we had to do on a weekly basis. [view](#)
61. Professor doesn't not always answer emails right away. She'll email back like three to two days later or possibly four days the most. Should find another way to communicate more to their students. [view](#)
62. I enjoy the email contact. With my mobile device with me at all time. Communication is great [view](#)
63. Wonderful class, and professor Dolittle is great. Thank you so much! [view](#)
64. Distance education is good. But instructors have to be mindful of how many hours there are in a week and of the fact that students have other responsibilities too. So, I am for rigorous standards, but think the objective could be achieved while keeping time-constraints in mind, so that optimum learning could be achieved w/out a lot of time-consuming busy-work. [view](#)
65. Classes online are very helpful and necessary because some times we can attend classes every day, thanks for provide this program classes. [view](#)
66. Very accessible and understandable [view](#)
67. I think over all it has been a really good experience. I think it would be nice to have a prep test or pre-test student can take to prepare for exams as a study option. Or even games that help the student practice the vocabulary word, for example a cross word puzzle, online flash cards, or a mix and match game. [view](#)
68. This XXXXXXXX teacher is terrible. XXXX gives horrible feedback and doesn't help at all. Worst class ever. [view](#)
69. I think online courses are beneficial to students and also to professors. I feel that I learn a lot more in my on line courses than in an actual class setting. [view](#)
70. there is good material and resources to look at online, however some of these resources have become slightly outdate. such as slide shows. overall, Im satisfied with the program. [view](#)
71. None at this time [view](#)
72. I like it and it's very convince [view](#)
73. The class was very disorganized, and when I first started the class it was difficult to figure out what I had to do. [view](#)
74. I like the program and I wish you can add more classes to it. [view](#)
75. Good! :) [view](#)
76. The programs are taught online are very interesting. I think professor's lessons should be posted on some websites for students so that they can practice questions and understand lessons in class better. [view](#)
77. everything is great. [view](#)
78. sometimes there is within the window where assignments are to be completed and then submitted, an area to save draft and later supposively be able to return and then submit homework assignment, but that is not the case, obviously i need more practice in my computer skills. [view](#)
79. I like online classes because my time is flexible. [view](#)
80. I love online classes they are very easy to use and you can interact with your classmate and instructor easily. [view](#)
81. Our teacher made it easier for us to understand how to better use this program in order to get our assignments done. [view](#)
82. GREAT EXPERIENCE! [view](#)

83. Ms. Grant teaches a great class! [view](#)
84. I like the freedom of doing assignments as I please. During the first few weeks I was able to work ahead of schedule due to long weekends. [view](#)
85. I love taking online classes. Please keep offering them. They are a time saver for me! [view](#)
86. I love the online classes offered! [view](#)
87. the online course is very convenient and i can save my time [view](#)
88. It is very useful. The method of teaching is good and student can be active. [view](#)
89. Online test can become a problem [view](#)
90. Online test can become a problem [view](#)
91. Online test can become a problem [view](#)
92. I enjoyed this class I think for me to take an online class it would have to be a full semester and not a 8 week course, other then that this class overall was good experience. [view](#)
93. All was OK. [view](#)
94. Great class! [view](#)
95. I have had difficulty in taking online quizzes. My instructor defined the testing timeline as every Saturday @ 8 a.m.-Monday @ 11:55 p.m. There have been two separate occasions when the quizzes have not be made available on Saturday. Both instances have been when there have been two tests over the course of one weekend. One instance was when I was required to take a chapter quiz and a unit exam. I wanted to take the quiz prior to the exam. The quiz was made available within the allocated timeline however, I felt added stress as it related to my time management. On both occasions, I made attempts to contact my instructor by email; for the first incident, I also left a phone message as provided by my instructor. I have taken other online courses at SAC/SCC and have been very satisfied with my experiences. Thank you for allowing me to share my concerns. [view](#)
96. I think my professor is a good teacher . She is really nice to help students. [view](#)
97. It would be beneficial to see instructor comments on the actual assignment that we submit to a class. Sometimes it is hard to know what about our assignment the instructor is grading because their comments are in a separate comment box. [view](#)
98. I would like to know what question I missed and the correct answer on a test or a quiz, just as if I had gotten a test back if I was in an actual classroom. The only thing I get after finishing a test or quiz is a percent and it leaves me wondering what questions I missed. [view](#)
99. Thanks for doing a great job. [view](#)
100. Keep up the good work. [view](#)
101. when taking exams sometimes if not pushed saved answers get deleted and counted as wrong. i was suppose to receive an a but instead received a b for 5 questions wrong [view](#)
102. I have had a very good experience using the Distance Education program. I work full time and online courses allow me to continue my education and work at my own pace. [view](#)
103. NONE [view](#)
104. the program needs to make the student feel like he or she isn't just a name on a list. [view](#)
105. I love distant education because I am able to work on my assignments and class work when I have time and the due dates are constant. I enjoy online classes overall because they cater to my needs and likes. [view](#)
106. I had an issue with blackboard, I kept on calling and I left a message but seems like no one is there to pick up the phone and no one returned my call. [view](#)
107. The Discussion Board is very slowly running and loading the messages' board. The browser hung off the students and (we)students finally closed and restarted the browser or changing another new browser when each times of loading messages were been frozen. Thank you so much for your mostly important concern. [view](#)
108. I think Bb work well. [view](#)
109. It is a excellent way to go through community college education! [view](#)
110. Taking online class is very convenient and save me a lot of time. Black Board is very easy to use and access. For me, it would be great if I can finish my major taking online classes only. [view](#)

111. This is my first DE course. I have enjoyed the experience. [view](#)
112. One thing I would want to share is the excessive use of blogs as assignments. I think the points assigned to them is too high, and we spend more time commenting on blogs than learning the material. [view](#)
113. Its great...hopefully in the future one is able to complete all the requirements for a certificate online [view](#)
114. The class was very well organized. [view](#)
115. Very well organized class. [view](#)
116. Communcation is vital and the information methods used for ONLINE (school) unit courses needs to be USER FRIENDLY programed at all levels! [view](#)
117. None [view](#)
118. I have found the online discussion boards to be very useful. I feel it is easier to communicate with other students on the discussion boards. The discussion boards have also allowed me to see different opinions and see different formats of assignments that I would not have been able to in a traditional classroom setting. [view](#)
119. Instructional videos would be helpful [view](#)
120. none [view](#)
121. It is hard to communicate and fully understand what you teacher expects. Also, when you receive a grade you have no idea what do did right and/or wrong so you can improve for the next paper. [view](#)
122. Good, Benefit for Student and Instructor communicating [view](#)
123. It is a great way to complete classes when you have to work and deal with family. [view](#)
124. N/A [view](#)
125. When professors know there is a hard chapter they should provide more help. More exercises for students who don't get it right away [view](#)
126. It's great to study online. [view](#)
127. Distance Education only works if the structor is involved...My Art instructor was great! [view](#)
128. Sheila Shain has the most organized online I have ever taken at any school. She is very communicative which is very important to me as a student. It reduces the amount of questions I ask. Updates, information and course documents are always readily available. [view](#)
129. None at this time. [view](#)
130. I would recommend to install some sort of Notification system for group members so we can get notifications when someone sends us a message/posts a reply etc. I had to always double check I didnt miss anything from my group mates and it was kind of inconvenient. [view](#)
131. Distance Education program is a great experience for those who don't have much time to go to campus. Even though this is an online class, everyone attends still need to spend the same amount of time as those on campus. Every instruction is very clear and detailed which also plays an important part in helping new students. [view](#)
132. on-line is tougher than I thought it would be. [view](#)
133. Bad teacher. There were 9 students in the beginning now there r only 3 left. Her teaching method is horrible, lectures were uncleared and she doesn't seem to know what is she teaching. There were so many assignments which she can not get done and expexting us to do it. Quite often she spent more than 2hrs trying to show us how to do the problem she called simple. The three of us were struggling to keep up with her teaching method. None of us think we could even pass the class with a passing grade. [view](#)
134. Your program is very helpful to me. [view](#)
135. Your Distance Education program is very convenient and helpful to students. [view](#)
136. It's very useful [view](#)
137. Took a quiz online and was informed that quiz could be resumed at later time. Was unable to resume quiz at a later time. "Time had expired" to take quiz. [view](#)
138. Save time, save Money and convenience for one who is working [view](#)
139. None at the moment [view](#)
140. Awesome class! [view](#)

141. I was able to learn at a consistent pace and engage my instructor if I had questions. The method of teaching that provides materials online helped a great deal. I was able to use my iPod and access the content. I don't understand why schools aren't using new methods like online learning from home with live lecture attendance online streaming. I think that if more classes like that were offered and people could ask questions at the same time it would be a new paradigm in education. [view](#)
142. I would complete a fully online degree if available. [view](#)
143. The teacher was very helpful, involved and skilled. She did a fantastic job. One of the better courses/instructors I have taken since returning to school. [view](#)
144. communication with instructor was sometimes difficult or took multiple back and forth messages to be clear on communication. [view](#)
145. Prof Coffman of KNPR 125 was very attentive and responsive. Great person & instructor. I would take another class with her in a heartbeat. Prof XXXXXXXXXX was abrupt, not responsive & didn't have an approachable online presence. Just because he or she didn't "micromanage" doesn't mean you shouldn't be more interactive. No feedback on DB assignments as you go along. How are you supposed to know if you're doing it right or wrong so you can improve on the next one assignment. [view](#)
146. Distance Education spend more time than in class with homework, discussion. [view](#)
147. Online Classes are great, it requires time management skills and requires you to constantly be on top of your work because no professor is there to guide you. I plan on taking several more online classes here at Santa Ana College [view](#)
148. Distance education program is very convenient ... I really recommend to my friends [view](#)
149. This is a really great program. [view](#)
150. Enjoyed the class...I learned a lot. [view](#)
- It is amazing we have a distance education program, especially for people like me that are fulltime employees and mom.
151. The only thing that bugged me about this particular online class was the instructor. He gave us the syllabus and never heard from him again. He never emailed us to see how we were doing. He completely forgot he had a class full of students. [view](#)
152. there should be required discussion boards for online/ hybrid courses. Making it easier for students to ask questions and the entire class will be able to access the instructors answer which would make everything much more simple . [view](#)
153. I like them [view](#)
154. Great Teacher [view](#)
155. Our professor was amazing! I like the fact the she herself is a student and that makes it easier for her to relate with us. she is very much outgoing and I enjoy that in a professor because it makes the class interesting. She is always willing to help at all times and I appreciated it. Keep up the great work! I hope to be a professor like her. [view](#)
156. Very well-organized and maintained. [view](#)
157. I enjoyed the distance education program because it allowed me much more flexibility with my busy schedule. I have done exceedingly well and all the tools on blackboard are easy enough to use. I will definitely continue to take online courses whenever possible. [view](#)
158. Professor Galvan is amazing. He was very prompt to respond to my e-mails when I had concerns and/or questions. I will miss this class. [view](#)
159. In my opinion distance education courses are great for students that do not have the time to physically attend courses. [view](#)
160. no comments [view](#)
161. In my opinion the program works just great for me the way it is running now. The professor responds quickly as well which helps so much. [view](#)
162. blackboard is slow and it takes forever to upload a program [view](#)
163. Personally, I dislike online courses more than I can express. I don't feel like I can properly engage in discussions. You have to wait for someone else to respond...and that is not something you can control. I would much rather take a class that meets in person. Unfortunately, the class I was taking was not offered except as an online class. [view](#)
164. n/a [view](#)

165. I really enjoyed the practice test on BB, and I'd like to see more of those types of practice test/quiz, worked into my grades too. [view](#)
166. Not a particularly good way to learn. But that happens to be my experience I'm sure other people do quite well. Distance for me as a student isn't a great way for me to learn. [view](#)
167. none [view](#)
168. Make professors communicate more with their class. Sometimes professors wont even reply to an email. Sometimes student needs help but doesn't know where to get it if the professor doesn't even answer back, very unprofessional of them. [view](#)
169. It is a good class, definitely makes you stay on top of your reading. [view](#)
170. Wouldn't recommend it to anyone [view](#)
171. Teacher does not provide much info on lessons or what we need to be doing. Does not communicate well. Tests were poorly written and quite confusing as well. [view](#)
172. hope that you have more on line classes. [view](#)
173. I like to study online. [view](#)
174. I HOPE YOU ADD MORE ON LINE CLASSES [view](#)
175. I feel that the Distance Education program is the most efficient and fair that it can be for the time being. [view](#)
176. N/A [view](#)
177. i dont like my online class [view](#)
178. It would be helpful to send an e-mail to all students enrolled in Distance Education when Blackboard is down for maintenance at least 1 week in advance. Since this is a distance education class, students need to plan their weekly study schedule according to the website and other classes if a full-time student. [view](#)
179. Really enjoyed my online course! Professor Nyssen replied to my emails quickly and efficiently. [view](#)
180. I did not benefit from the discussion board. [view](#)
181. It was hard to get direct answers from my instructor. When I asked questions or turned work in early, she was slow to respond. [view](#)
182. NA [view](#)
183. None. [view](#)
184. When having assignments on articles or on website reviews it helps when the links are working or current links. Many of the links from this course were out dated and made it very difficult to complete assignments. It would be a great help if either the blackboard was updated to the links or if the links for articles and websites were changed to usable URL's. Taking a test on blackboard sometimes posed a problem. Switching from one question to another is supposed to be a simple process but it would take a very long time to load which lost me time during timed tests. [view](#)
185. It was a great class [view](#)
186. The only inconvenience I encountered with this class was with my final exam and submitting activities. [view](#)
187. I seemed to have a problem with turning in some of my Internet assignments. For two weeks straight I sent my work but it wasn't received by my instructor. Other than that, blackboard worked completely fine. [view](#)
188. easier access to upload assignments with attachments. I uploaded my last two assignments and my professor did not receive my attached photos. [view](#)
189. Distance education program is very helpful to the students who are working full time. But without an excellent Professor like Dr. Bennett, the success of this program is impossible. Dr. Bennett is indeed a person with a big heart that understands and treats his students fairly. English is my second language, but his teaching strategy is very easy to understand. [view](#)
190. I really enjoyed taking this course. The way the course was set up allowed for ease of progression in the course while still providing enough time in my busy schedule. Thank you! [view](#)
191. sometimes it is hard taking an intense course online because you are not able to communicate in person with the professor's. overall the courses and programs are great. [view](#)
192. I was denied from taking my final exam on blackboard, I have been attempting to contact my instructor about the situation but I have still not received a reply, he has been ignoring my emails but he did drop my grade to a "D" because I was not able to submit m Final. I greatly retreat using my [view](#)

Post 911 GI Bill benefits to take this course. It has unfairly dropped my grade and is now affecting my transfer GPA.

193. Nice class and a really good Professor !! It is a shame that some people have to take advantage of the trust she gives them and messes it up for every one else. I think I needed the lecture class more for this subject. I could have done better. Thank you.
