

## ASCCC's Resources for Proposed Reorganization - DISCUSSION

### 1. ASCCC Resolution Number 01.06: Department Organization

Spring 1987

*Resolved that the Academic Senate support the concept of collegial decision-making in the review and evaluation of proposals which would change the organization or functions of specific departments within a college and/or district, and*

*Resolved that such proposals should be reviewed and approved by the appropriate faculty bodies, e.g. the department, the curriculum committee, and the academic senate.*

### 2. Some relevant responsibilities of your AS as enumerated in the 10+1 ([https://www.asccc.org/10\\_1](https://www.asccc.org/10_1)) might include the following:

**4. Educational and program development** (if the restructuring impacts academic programs or the creation, evaluation, or possible deactivation of academic programs)

**6. District and college governance structures**, as related to faculty roles (are we talking about restructuring into different divisions/ departments? In that case, will there be a change in the number/ arrangement of chairs or division representatives that sit on other governance committees? If so, this applies).

There may be concerns related to #9 and #10 as well.

Next Steps: Developing/creating a process for review and approval of reorganization proposal?
