

The ACCJC visiting team held several interviews with a variety of constituency groups and participatory governance committees on March 8 and 9. They also held two Open Forums and one Exit Report during their time with us. The visiting team's focus was on two core inquiries; 1) implementation of improvements/redesign for assessment and program review that support resource allocation and 2) the college's implementation and alignment with District-wide sustainability efforts. Santa Ana College will receive the commission's accreditation decision and/or recommendations in the weeks to come.
